ABOUT

I design systems that enable product teams to build with LLMs: agent harnesses, design systems management, evals, consistency audits, plus the operations that make them whole. Lately, I've been leading our company-wide LLM acceleration initiative, turning the product team into co-owners of their production codebase. Behind that sit 10+ years designing B2B products in high-stakes environments: iGaming, localisation, enterprise software. At Fast Track AI, I drove design through 15x revenue growth while keeping NPS consistently above 90. I've relocated across four countries and two continents, and I can code enough to prototype and speak dev fluently, which makes cross-functional collaboration and tech-design alignment fluid and accurate.

SKILLS & TOOLS

Agent Harnesses · Context Engineering · Evals · System Audits · Design-to-Code Pipelines
AI Fluency · Adoption & Enablement · LLM-assisted Development · Design System Management
UX/UI · Prototyping · User Research · Information Architecture · Data Visualisation
Figma · Adobe CC · Hotjar · Grafana · ClickUp · Jira · HTML/CSS/JS · Localisation/i18n

WHERE I'M MOST USEFUL

- **Intelligent systems, end to end:** Harnesses, agent context, evals, and the adoption that makes teams trust them.
- **Legacy systems under pressure:** Technical debt, tight capacity, scale-driven auditing.
- **Multi-market complexity:** Localisation that goes beyond translation: timezones, compliance, cultural nuance.

EXPERIENCE

Fast Track AI: Senior Product Designer · Barcelona / Malta · 2021 to present

- Built an agent-driven design-to-production harness: designers ship production components through eval gates and CI. The component library went from a handful of new components in three years to 12 in six months.
 - Designed and shipped the first natural-language CRM in iGaming. Live to every partner within three days of launch.
 - Unlocked three new markets (Brazil, LatAm, APAC) through localisation: timezone tools, i18n, RTL support.
 - Eliminated SMS billing disputes entirely (from five-figure claims to zero) via encoding detection system.
 - Awards: [SBC Europe 2026](#) (Industry Innovation of the Year), [AIBC 2025](#) (Best AI Solution), [SiGMA Americas 2025](#) (Best Customer Retention), [SBC LatAm 2024](#)
- Case studies at miguelangelo.tech/work

Unbabel: Design Operations · Philippines · 2017 to 2021

- Early machine-learning adopter (2017): integrated machine translation with human review workflows.
- Built localisation pipelines for Fortune 500 clients (Adidas, PepsiCo), contributing \$2M+ annually.

Presslabs: Founding Designer · Romania · 2012 to 2017

- First in-house designer. Built brand identity, design system, and product UI from zero.

SIDE PROJECTS

- **Norma** (2026): Multi-tenant SaaS running architecture studios: CRM, client portal, LLM-powered secretary. In production, EU-funded. afharchi.com
 - **Kallax** (2026): Vinyl companion app. Live on [Play Store](#) & [App Store](#). kallax.app
 - **Exotica Radio** (2017 to present): Internet radio streaming my record collection. #1 on Google. exotica.radio
 - **Codex Tarot** (2024): Neuro-symbolic card reading. Live on [Play Store](#). codextarot.com
